

# Fully automatic press sliding tester

## MODEL: WE-360S

Various pressing and sliding test, with high accuracy of force, easy operation convenient settings and high degree of automation

In the process of use, the corresponding coordinates can be added to accomplish a wider range of applicability

## Customized testing equipment and tools

### Test items

1. Electronic product pressure test
2. Key press stroke and pressure analysis
3. Compression life test

### Product features

1. Pressure stroke and force can be adjusted according to customer's need
2. High repetition accuracy
3. Test data can be stored
4. Suitable for small touch screen electronics

### Technical Parameters

Model	WE-360S
Max. travel in Z-direction	260mm
Max. travel in X-direction	160mm
Max. travel in Y-direction	260mm
Max. number of tests	99,999cycles
Control method	PLC+Notebook
Display method	IPC
Machine size	900X900X2150mm (L/W/H)
Max. power	800W
Power supply	AC 220V 50Hz
