

Hinge Cycling Tester

MODEL: TQ-450T

TQ-450T is suitable for the iMac hinge life test, it can accurately measure the corresponding change curve of shaft torque and angle, also it can accurately control the swing angle, speed, set times and pause time.

Customized test equipment
and fixtures

Test Items

1. iMac Hinge Life Test

Features

1. The angle and speed of the test can be set
2. The platform can lift up to 200mm
3. Gripper fixture can meet different samples

Technical Parameters

Model	TQ450T
Test Stroke	0-360°
Fastest test speed	200° /sec
Minimum display angle	0.5°
Control Method	PLC + Servo
Dimensions	1100x850x1600 mm(L/W/H)
Weight	125KG
Maximum power	1000W
