

Glasses twist tester

MODEL: GT-002

Suitable for the twist test for all kinds of glasses. Accurately achieve the various angles and speeds required by the customer to facilitate the simulation of human wear.

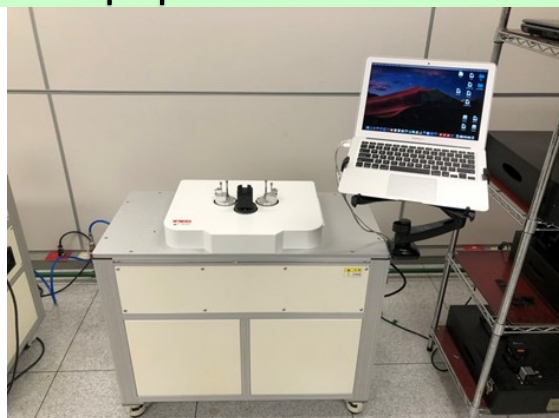

Test items

1. Glasses twist test

Product features

1. Easy operation and maintenance
2. Torque generated by turning to a specific angle can be informed precisely to the user

Customized testing equipment and tools

Technical Parameters

| | |
|-------|--------|
| Model | GT-002 |
|-------|--------|

| | |
|-----------------------|-------------|
| Max. Test speed range | 7 times/min |
|-----------------------|-------------|

| | |
|----------------|--------------------------|
| Control method | PLC + HMI + Servo motors |
|----------------|--------------------------|

| | |
|--------------|------------------------------|
| Machine size | 920mmX450mmX900mm (L/W/H) |
|--------------|------------------------------|

| | |
|--------------|-------------|
| Power supply | AC220V 50HZ |
|--------------|-------------|

| | |
|------------|-------|
| Max. power | 1500W |
|------------|-------|
